- I/O Ports: DC-In/Headphone/USB Type-A Port
- Adapter Included

The DCR-90BT is a compact DAB+/FM-RDS clock radio with an integrated speaker and automatic time settings. It synchronizes the time from the DAB+ or RDS-CT signal so you always have the correct time. Use the sleep timer to fall asleep to your favourite songs. Unlike its predecessor, the built-in Bluetooth allows you to stream your favourite tunes wirelessly on top of using AUX-in or line-out.

The backlit and easy-to-read display contains all information for service data and station info. The 2 alarm timers will wake you up comfortably with music or buzzer. With the DCR-90BT, we made sure it offers maximum convenience with an USB output for charging your phones or smaller devices without occupying another socket on your wall.
